

It's Not Right

D.I.

It's not right
Wise up - and I'll tell you what I see
Your life - as complex as can be
People in the streets are runnin' from the police
It's not right
This hate - sure isn't what we need
Don't believe everything you read
Sometimes things aren't exactly as they seem
It's not right
Watching desinigration, looking for recreation
Hey
Analyze these crazy lies still I find I ask myself "why?"
Sometimes I feel that I could snap
In life there's no turnin' back
I'm getting sick of all of that
Just more brain control, another mind attack
Wise up - to a regulated scene
Back off - you're makin' people bleed
Oppressed - we're only human beings
It's not right (4x)
Machines - are wandering in the streets
Attack - I wonder if our future's bleeding
Crime and drugs destroy the world and you know it
It's not right (4x)
My blood and pressure climbs, my E and G hit a red line
Weeding through this constant crap the straw that broke the camel's back
Looking at a high cliff and rape - oink
What illusions will my mind create
Sometimes I feel I think too much
But I must hold on I can't be losing touch
Constant pressure all the time just to be the next in line
Hey
Don't care what they say I just want to get away
Wise up - I'll tell you what I've seen
Your lives - are as screwed up as can be
People in the streets still runnin' from the police
It's not right
This hate - sure isn't what we need
Don't believe everything you read
It's not right...
