

Funny how I've been the loser all the while
I've been afraid and like the child
I forgot how much I needed you
It's strange but true
I love me more than I loved you
I lost my chance of life with you, when I took my time to say i
t
Now it's nothing to do with Heaven, nothing to do with fame
Only the beat in my heart when I call your name

Star, yeah yeah yeah, higher than reality
Star, yeah yeah yeah, you were always light years ahead of me
Stay, yeah yeah yeah, we burned twice as bright - and half as l
ong, but
Star, yeah yeah yeah, just shine on, just shine on and on and o
n

I love you till the end of time
I really want to make you mine
I love you till the end of time
I really want to make you mine

No I'm living with another in a crowded room
Crowded room becomes a vision
Of lost days spent with you
I got a state of mind and realised
What I did to you then
I got my chance now with another, I'm gonna prove it to them
Now it's nothing to do with Heaven, nothing to do with fame
Only the beat in my heart when I call your name

Star, yeah yeah yeah, higher than reality
Star, yeah yeah yeah, you were always light years ahead of me
Stay, yeah yeah yeah, we burned twice as bright - and half as l
ong, but
Star, yeah yeah yeah, just shine on, just shine on and on and o
n

I love you till the end of time
I really want to make you mine
I love you till the end of time
I really want to make you mine
