

# Take Me Away

D:Ream

Take me away to a strange and foreign land  
And leave me to be - let me lay my head down on the sand  
We're reachin' out for something special, our minds may never know  
It's the kind of place we dream of and then let go - ah please

I'm OK, you alright, just the same every night  
Living for the here and now, yeah yeah, yeah  
I love it, you love it, we love it - letting go, no no  
Come on and

Take me away, come on and take me, come come, and take me away

Take me away to a better place than this  
Sometimes it's better to die than to live  
I will not miss all the hurt I feel around me these eyes have never seen  
And the lines between the words we seldom mean - I mean words like

I'm OK, you alright, just the same every night  
Living for the here and now, yeah yeah, yeah  
I love it, you love it, we love it - letting go, no no  
Come on and

Take me away, come on and take me, come come, and take me away

I'm living today just like every day  
Come on and take me away...
