

Indestructible Overdose

Dááth

I'm Feeding the Virus that's released the poison
my addictions running out of control
This idea of a restrained inception
exposes your true ignorance

Spread the disease and arrive at
the point that your trying to make
now you have spoken your last words
they will be your final lie

I have a thirst that's
burning in my mouth
feeling overwhelmed i need to get high
its hard to envision sobriety
while I'm downing handfuls of dissent

Spread the disease and arrive at
the point that your trying to make
now you have spoken your last words
they will be your final lie

further down the spiral we go
an indestructible overdose

spread the disease and arrive
at this goddamn point your trying to make
spread the disease and arrive
now you have spoken your only last words
spread the disease and I'm craving
sickness desensitized
substance abuse has arrived at an
indestructible overdose

you fucking open up the bottle
swallow those goddamn pills
indestructible overdose
