

Embers

Dabin

Wait for it, I'm all alone I can see you watching
I stand still, and pull you near

So you come on closer, and you feel me burn
Like last night's embers, I still remember

Still remember

Energy, with open eyes till the early morning
And all I see, is your fire

So you come on closer, and you feel me burn
Like last night's embers, I still remember

Still remember
Still remember

Still remember
Still remember

Still remember
Still remember
