

Remember

Dabin

It's midnight
We've been out here for hours underneath the starlight
And I'm tired, but I don't wanna close my eyes
'Cause I might miss this
Time is goin' way too fast
I'm kinda blinkin'
This'll all be in our past

Wait a second, while I take
A picture in my head
I wanna save
This moment forever
'Cause it'll fade away
And I just wanna remember
The way that the light hits your face

It's daylight
We only have an hour, gotta get you
To your flight
And it's time now
But I don't wanna say goodbye
I'm holding on 'cause
It's all going by too fast
Before we know it
This'll all be in our past

Wait a second, while I take
A picture in my head
I wanna save
This moment forever
'Cause it'll fade away
And I just wanna remember
The way that the light hits your face
'Cause I know everything
Is gonna change
This moment forever
And it'll fade away
I just wanna remember
The way that the light hits your face

Wait a second, while I take
A picture in my head
I wanna save
This moment forever
'Cause it'll fade away
And I just wanna remember
The way that the light hits your face
'Cause I know everything
Is gonna change
This moment forever
And it'll fade away
I just wanna remember
The way that the light hits your face

And I just wanna remember
The way that the light hits your face
