

Worlds Away

Dabin

Hey you
How's the world look from way up there?
I miss you
But I'm getting scared

'Cause you used to be
Glued to me so perfectly
Filling all the in-betweens
Now there's nothing there

How am I supposed to be
Yours when I can't see your face
How am I supposed to not
Miss you with all of this space
'Cause you say you'll meet
Me there someday
But how am I supposed to be
Close to you now
From worlds away

From worlds away
From worlds away

Full Moon
It's always when I feel it most
Can almost hear you say
That I'm not alone

'Cause we used to be
Spinning out like Mercury
But now there's no more ground beneath
Anymore

How am I supposed to be
Yours when I can't see your face
How am I supposed to not
Miss you with all of this space
'Cause you say you'll meet
Me there someday
But how am I supposed to be
Close to you now

It's cold tonight
Darling are you cold tonight
I just wanna hold you tight
If you're really mine
'Cause I can keep
Shouting across the galaxies
Would you do that to me
If you're really mine?

It's cold tonight
Darling are you cold tonight
I just wanna hold you tight
If you're really mine
'Cause I can keep
Shouting across the galaxies

Would you do that to me
If you're really mine?

It's cold tonight
Darling are you cold tonight
I just wanna hold you tight
If you're really mine
'Cause I can keep
Shouting across the galaxies
Would you do that to me
If you're really mine?
