Daft Punk

Hey Bob I'm looking at what Jack was talking about and it's definitely not a particle that's nearby. It is a bright object and it's obviously rotating because it's flashing, it's way out in the distance, certainly rotating in a very rhythmic fashion be cause the flashes come around almost on time. As we look back at the earth it's up at about 11 o'clock, about maybe ten or twe lve diameters. I don't know whether that does you any good, but there's something out there.
