

## Settle Down

Daði Freyr

I don't believe that we would ever need  
To settle down  
Only so that we can be together  
You are my queen and nobody else  
Can wear your crown

We take another step  
And then another one  
There is no  
Rushing this

'Cause while we move  
In the same direction  
Every road leads the right way

But I don't believe that we could ever need  
To settle down  
Only so that we can be together  
You are my queen and nobody else  
Can wear your crown  
We can do whatever

Me and you, you and I  
Not only us still that of course  
'Cause I love you  
And you love me  
That's pretty much enough

It doesn't feel the same  
Although it's similar  
To what we did yesterday  
'Cause while we move  
In the same direction  
Every road leads the right way

But I don't believe that we could ever need  
To settle down  
Only so that we can be together  
You are my queen and nobody else  
Can wear your crown  
We can do whatever
