

Bird Bones

Daisy The Great

She was just back in town
Where's my friend where is she now
In the stars in the ground
Where's my friend
Where is she now
She was just back in town
Where's my friend where is she now
Seeping into every sound
Where's my friend
Where is she now

She was just back in town
Where's my friend where is she now
In the stars in the ground
Where's my friend
Where is she now
She was just back in town
Where's my friend where is she now
Seeping into every sound
Where's my friend
Where is she now

Bird bones
In the road
Was he on his way
Feathers gone
Toes all curled up
It's too cold out here to be this bare
Bones in the road
Was he far away
From home
Shed his skin and eyes and tongue
Does he know he didn't disappear

Don't go
Take my note
Are you on your way
Left your home
With your body
It's too cold out here to be this Bare
No are you gone
You're so far away from home
Shed your skin and eyes and tongue
Do you know you didn't disappear

She was just back in town
Where's my friend where is she now
In the stars in the ground
Where's my friend
Where is she now
She was just back in town
Where's my friend where is she now
Seeping into every sound
Where's my friend
Where is she now
Where's my friend
Does she know she didn't disappear

Do you know you didn't disappear
