

## Everywhere

Daisy The Great

Is it loud?  
Is it better than the world you know?  
Did you make me proud?  
Are they singing all the words you wrote?  
Stay low enough to wait it out  
And watch your head  
Your knees are killing you  
You bend too long to break it in  
To make it out alive  
On the other side

It's everywhere  
It's easy to see  
When you're so far away  
The closer you get to it, the bubble fades  
And nothing is left  
But everything you made  
Up in your head  
About the better days

Watch the bird  
He's been living on the neighbor's roof  
And you wave a worm  
Is he ever gonna come to you?  
You try so hard to let him in  
Don't blame the bird, he's innocent  
And everything you want is close  
Enough to reach a hand  
But never touch the ground  
On the other side

It's everywhere  
It's easy to see  
When you're so far away  
The closer you get to it, the bubble fades  
And nothing is left  
But everything you made  
Up in your head  
About the better days

Is it loud?  
Is it better than the world you know?  
Did you make me proud?  
Are they singing all the words you wrote?
