

Northern Lights

Dala

I saw the world through Northern eyes

La la la, la la la la

She's got a French last name and a homemade hula hoop
Laughing outside on a summer night with nothing else to do
Everyone is waiting for their fame
But the kid inside is satisfied, just to stay up late

La la la, la la la la

The party's rolling like a movie set,
And I'm feeling sentimental for what hasn't happened yet
Everyone is older than their dream
And I could be on the payroll but I'm where I want to be

And it's one more night without you
Just one more night without you
I can't see the Northern lights, just by wishing it were true
One more night without...

La la la, la la la la
La la la, la la la la

I'm writing my confessions in the sand
Out here, somewhere in between a mountain and a man
Everyone lines up for something new
But all the stars are falling in the darkness of their rooms

And it's one more night without you
Just one more night without you
I can't see the Northern lights, just by wishing it were true
One more night ...

I saw the world through Northern eyes
I stood before the fire light
And I know there's so much more that I
Could be

I always fall in love from far away
'Cause everyone is someone, when they're lit up on a stage

And it's one more night without you
Just one more night without you
I can't see the Northern lights, just by wishing it were true
One more night without you

La la la, la la la la
I saw the world through Northern eyes
