

# Explode

## Damageplan

Explode

I feel you stare, watch me not care  
Glare at the freak, you've no control  
Feel your eyes probing me, judging me  
Only makes me want to explode, just explode

You don't know me but you fear me  
Tainted with ink, riddled with holes  
Staring and pointing, stupidity  
Only makes me want to explode, just explode  
Explode, just explode

All that's you see, scars that's made me  
See in your eyes, all you despise  
Judge me by what you see, leave me be  
Get away I'm going to explode, just explode  
Explode, just explode

Fear what you don't understand  
It will always be  
Fear what you don't understand  
As it always was

Fear what you don't understand  
It will always be  
Fear what you don't understand  
I just want to explode, just explode  
Explode, just explode
