

Optical Illusion

Dami Im

I've been trying to change but you're holding my throat
Every little thing I say comes under the scope
I just wanna break all the rules in your head
But if you wanna be another sheep then follow the rest

I wanna cuss (You got something to say)
I shave my head (You got something to say)
Go on and judge, I love to see you mad
I'll pick a fight (You got something to say)
I'll get a ride (You got something to say)
Go on and judge, you don't know who I am

I'm an optical illusion you've never seen before
You think you're keeping with me but you're a dinosaur
I am an equation you can never solve
You think you found a keyhole but you're nowhere near the door

I rap on the cage that you're keeping me in
I'm a little hand grenade and you're pulling the pin
Trying to turn the page but you're counting my sins
If you wanna see my hand then you're gonna win

I'll get a tattoo (You got something to say)
Take off my shoes (You got something to say)
Go on and judge, I love to see you mad
Put on some weight (You got something to say)
Make a mistake (You got something to say)
Go on and judge, you don't know who I am

I'm an optical illusion you've never seen before
You think you're keeping with me but you're a dinosaur
I am an equation you can never solve
You think you found a keyhole but you're nowhere near the door

I'll never change your perception
With all of my [?] deflection
I won't answer to another man
I'll never [?] your perfection
Until you can see your reflection
Oh, oh, oh
Da-da-da-da-da-da
Ah-ah-ah
Na-na-na

I'm an optical illusion you've never seen before
You think you're keeping with me but you're a dinosaur
I am an equation you can never solve
You think you found a keyhole but you're nowhere near the door
An optical illusion
You think you're keeping with me but you're a dinosaur
I am an equation you can never solve
Think you found a keyhole but you're nowhere near the door
