

# I Miss You

Damon Albarn

(I miss you)  
I put it on my text (I miss you)  
But my phone rejects it (I miss you)  
Is it a question of the consciousness (I miss you)  
Is it a question of... where we'll go come through (I miss you)  
Now (I miss you)  
I wish I had a car to travel (I miss you)  
Over oceans and mountains (I miss you)  
Wish that I could play with you  
I... and the moons and skyscraper can't get pollution out of my head  
And it never seems to buy you anything, every night I sing (I miss you)  
I think I'm in a bubble here (I miss you)  
It gets popped with all the guilt (I miss you)  
They paid upon you everyday (I miss you)  
I just want to get away  
And the moons and skyscraper can't get pollution out of my head  
And it don't seem to buy you anything, every night I sing  
I miss you□
