

# Baby Love

Dan Bern

baby love  
baby love is what we got  
baby love  
baby love is what we got

no good poetry coming from my mouth  
no neat chords ringing on ringing on ringing on  
my guitar  
just baby love  
baby love is what we've got

baby love  
baby love is what we've got

leave behind your sadness  
I'll leave behind my loneliness  
forget your hat  
I'll forget my dress  
there'll only be time for us

when you touch me  
it aint really baby love  
it's a true love  
an adult love with all the complications of

there's a bridge in every song  
to complicate things and tell you what's wrong  
but I'm too tired after my baby playing  
put your head on my lap  
and we could have some

let's nauseate the people around us  
make them squirm  
make them really really jealous.

pretty uncool my brother says.  
lacking in decorum  
and me and me and me  
so well read.

oh we are not babies  
I know that.  
we do not babies  
thank god for that.

but when you eat and sleep  
you look just like a baby  
when you whine you  
drive me crazy  
you might as well be my baby

oh baby love  
teenage love  
true love  
adult love is what we've got

old love

real love  
true love is what we've got
