

Zoo

Dan Black

I could just die tonight with you
Another bunch of lies, you'll never see a real me
Look away, look away, at the words you say
Slowly fade away

In my head, its a zoo
In my head its only you

I want you, you, but you will never want me, I see
I want you, you, but you will never want me, I see

An animal stood in the trees in the night
Two specs of light, then he disappeared, out of sight
Look away, look away, at the words you say
Slowly fade away

In my head, its a zoo
In my head its only you

I want you, you, but you will never want me, I see
I want you, you, but you will never want me, I see
I want you, you, but you will never want me, I see

In my head, its a zoo
In my head its only you

I want you, you, but you will never want me, I see
I want you, you, but you will never want me, I see
