

# In No Man's Sky

Dan Bull

Of all the gin joints  
In all the towns  
In all the world  
In all the galaxies  
You had to be  
The one into which I've been hurled  
In the distance one little man  
Sits on the fringe of a wondrous expanse  
Physics, math, leave nothing to chance  
Binary beats make numbers dance  
On a map as vast as our lack of understanding  
Of even the spot you stand in  
Avast, nail your map to the mast  
Pieces of 8-bit data drift past  
Digits and data drifting in space  
Just sit and wait to be diligently saved  
In the Atlas and graphed  
And collated in ways  
Not even N.A.S.A could track  
Im Charles Darwin as he lands at the Galapagos  
Encountering a thousand-pound  
And winged Dog-billed Platypus

In No Man's Sky  
Climb in your seat  
Close the window and fly  
Rise up now  
Go and find  
Why life thrives  
Look low and high  
Leave behind a gleaming line  
Of notes and signs  
Keep your enemies close  
See foes and fight  
For your life  
Until you're home and dry  
Avert your eyes  
From solar glowing lamp lights  
Who knew paradise would be so damn bright?  
Bright, bright

Iridescent  
Opalescent  
So pleasant  
I'm getting a bit tumescent  
Free fall  
Three, Four  
Kilometres to the floor

Wee, Phwoar!  
Me, I'm enthralled  
With all of the flora  
Fauna before me  
I thought I'd fall on a flaw  
Forced to the fore  
Fallen and forlorn  
Forever more  
What a terrible thought to be fought  
Before terraforming, exploring  
Forage through foreign forms  
Forest, Fawn  
Flower and thorn  
I've found and filed a thousand kinds  
And now I'll find a thousand more  
I didn't  
Forget them  
They're hidden  
Fluorescent  
Forbidden  
Effervescent  
I'm getting a bit tumescent  
If I am fortunate enough  
To find a formula for all the stuff  
The sky will fall from up above  
I'm flying for the love  
For the love  
For the love, for the love  
For the love  
For the love, For the love

Wherever we've been we leave pollution

We need a clean solution  
No matter whatever you believe in, you should  
See through to the conclusion  
Human beings are being a nuisance  
An abusive stream of evolution  
Views that seem to disagree  
Are surely leading you to ruin  
Through and through  
We need to do away with the delusion  
That the universe is merely here for amusement  
Hear the music  
It's a mutagen  
To neuter men's illusion  
Every creature's doomed  
For use through what we do to them  
Cease taking previous mistakes  
And reproducing them  
Let's clean the slate  
Wipe the canvas  
And make the painting beautiful again
