

Technoshock

Dan Bull

Technoshock
Technoshock
Technoshock (Technoshock)
Technoshock
Technoshock
Technoshock
Feel the pressure drop

Urban biology, dirty technology
Perfectly possibly cursed by the prophecy
Personal property curbing your privacy
Served with a side of deserted democracy
Stirring the pot, we deserve an apology
Tearing apart their disturbed ideology
Burn inequality, penury, poverty
Merging them all heaven, Earth, and philosophy
Apes in caves painting pictures
Gave way to ancient scriptures
Body modification, veins and stitches
First it was ink, now it's data and digits
So no matter how painful the itch is
Change is a fixture your brain's got to live with
Or is it one of Satan's tricks?
What's waiting to get us when we race to the finish?
Our base nature's unable to take to the pace of the changes we make from beg
innings
But those who adapt faster than their competitors are better placed to be ta
king the winnings

Night city days full of trouble and pain
They hit your mind in many ways, you'll struggle to explain
These night city days will try to drive you insane
'Til you finally face the horrors they contain
Night city days full of trouble and pain
Night city days hit your mind in many ways
Night city days, you'll struggle to explain
Night city days, they'll drive you insane
'Til you finally face the horrors they contain
Face the horrors they contain
Face the horrors they contain
Face the Technoshock, Technoshock, Technoshock
Feel the pressure drop
Technoshock, Technoshock, Technoshock
Feel the pressure drop
Technoshock make your head go pop

Apes in caves painting pictures
Gave way to ancient scriptures
Body modification, veins and stitches
First it was ink, now it's data and digits
So no matter how painful the itch is
Change is a fixture your brain's got to live with
Or is it one of Satan's tricks?
What's waiting to get us when we race to the finish?
Our base nature's unable to take to the pace of the changes we make from beg
innings
But those who adapt faster than their competitors are better placed to be ta

king the winnings
First you will follow with virtue and valour
'Til virtual horror disturbs you so violently
Total voracity, terminal velocity
Turning with ferocity 'til your virtuosity
Shows you're a prodigy, bones in your body fall
Awed physiology, cause and pathology
Wars and the world are mere lore and mythology
More than you thought of in all your philosophy

Night city days full of trouble and pain
They hit your mind in many ways, you'll struggle to explain
These night city days will try to drive you insane
'Til you finally face the horrors they contain
Night city days full of trouble and pain
Night city days hit your mind in many ways
Night city days, you'll struggle to explain
Night city days, they'll drive you insane
Night city days
Night city days
Night city days
Night city days
