

Stephen's got a ticket to the show  
Each week, front row  
To watch me wrestle with my thoughts  
And come up against the odds

But now he's called and broke the news  
That we've been shut down  
And all the progress that's been made  
Is now just hollow sound

Don't leave me, don't say goodbye  
I need you now and I need you by my side  
And if I can't go on, can I pay you for the night?  
To tell me everything will be alright  
Oh tell me everything will be alright

Should I move to Buffalo?  
Give the east coast a go  
Horizontal on your couch  
I can watch time flow

Or come enjoy the weather here  
The endless clientele  
Cause they're all fucking nuts  
Crazy as hell

Don't leave me, don't say goodbye  
I need you now and I need you by my side  
And if I can't go on, can I pay you for the night?  
To tell me everything will be alright  
Oh tell me everything will be alright

I can't find the words  
So I just say so long  
And now I'll move on to the next  
Third times a charm

Don't leave me, don't say goodbye  
I need you now and I need you by my side  
And if I can't go on, can I pay you for the night?  
To tell me everything, tell me everything  
Oh tell me everything will be alright
