

Proximity

Dan Mangan

And so I like the night
If you're next to me
Please don't ever die
I need proximity

And yes I like the moon
Or anything at all
That's just so goddamn big
I like feeling small

'Cause feeling small
Is feeling free
Beneath the weight of it all
Lies humility

But there are so many questions, like:

Will I ever be Joni?
Will you ever be Meryl?
Has life got us over a barrel?
And what's the worst that could happen?
What's the worst that could happen?
What's the worst that could happen?

And so I like the night
If you're next to me
Please don't ever die
I need proximity
