

Long Ago

Dan Reeder

Long ago before the world had cooled
The moon flew out of the earth
Long ago before the world had cooled
The moon flew out of the earth

Eons it spun 'round the earth and the sun
Until it was perfectly round
And I have been waiting an hour now
For a bus on the outskirts of town

Long ago before the world had cooled
The moon flew out of the earth
Long ago before the world had cooled
The moon flew out of the earth

Maybe this bus doesn't run anymore
Or maybe the schedule is wrong
Walking is out of the question from here
It's raining and my youth is gone

Long ago before the world had cooled
The moon flew out of the earth
Long ago before the world had cooled
The moon flew out of the earth
