

I Will Be There

Dan Seals

We have known each other for us long
We are most like one
And the ties of our love are so strong
They could never be undone

But if you should ever get restless
Just remember where ever you go

In every smile, every face
Any time, any place
I will be there
Like a light in the dark
When you look in your heart
You'll stop and stare
And I will be there

There are times when you may get lonely
Feeling lost on your own
But if there's one thing this love has shown me
We are never alone
And no matter how far away you are
My love follows you

In every smile, every face
Any time, any place
I will be there
Like a light in the dark
When you look in your heart
You'll stop and stare
And I will be there

On a cold night, in the moonlight
When you're dreamin', and when you rise in the sunrise
Baby, I swear I will be there
Cause no matter how far away you are
My love follows you

In every smile, every face
Any time, any place
I will be there
Like a light in the dark
When you look in your heart
You'll stop and stare
And I will be there

I will be there, any time, I will be there

On a cold night, in the moonlight and when you rise, in the sunrise
Baby I will be there
