

Detonate

Dan Talevski

I could stay here forever
Wanna be blinded by these lights
Where we can hide alone and no one knows
Let's take another shot 'till we're numb inside
I love it yeah
I'm used to being on my own
I never had the touch, someone to trust
You came into my life when I was alone

Couldn't navigate my way through the static
I was fading out and I couldn't stand it
Now we're in the dark found the key we unlocked it

Now baby I
Wanna fall into the sky
Never look back
My Ride or die
You saved me from going off
Was gonna detonate, detonate

Baby I
Wanna fall into the sky
Never look back
My Ride or die
You saved me from going off
Was gonna detonate, detonate

I was looking for something
Was feeling lost and out of time
But then you saved me from myself, my hell, and everything keeping me up at night

Couldn't navigate my way through the static
I was fading out and I couldn't stand it
Now we're in the dark found the key we unlocked it

Now baby I
Wanna fall into the sky
Never look back
My Ride or die
You saved me from going off
Was gonna detonate, detonate

Baby I
Wanna fall into the sky
Never look back
My Ride or die
You saved me from going off
Was gonna detonate, detonate

Dive down deeper
With me just the two of us
Won't let go of this lovin
We built for us
Dive down deeper
With me just the two of us
Won't let go of this lovin

We built for us

Now baby I

Wanna fall into the sky

Never look back

My Ride or die

You saved me from going off

Was gonna detonate, detonate, detonate
