Touch The Sky

Dan Talevski

Baby, I'm so alive every time you look at me
And the stars in your eyes shine so bright, it's ecstasy, yeah

Take my hand, we'll jump in the ocean
Close your eyes, I know where we're going
Feels so high we're out of our bodies
It's just me and you tonight

I've been waiting for this moment, baby, all my life
There's nowhere else I'd rather be than right here by your side
It's taking over me and I can't let you go
And when the lightning strikes our love, yeah, we can touch the sky

Baby, it's paradise every time I kiss your lips
And I don't wanna come back down if heaven's like this

Take my hand, we'll jump in the ocean
Close your eyes, I know where we're going
Feels so high we're out of our bodies
It's just me and you tonight

I've been waiting for this moment, baby, all my life
There's nowhere else I'd rather be than right here by your side
It's taking over me and I can't let you go
And when the lightning strikes our love, yeah, we can touch the sky
...
