

The Conqueror Worm

Dance Gavin Dance

This is DGD
Getting high like E40
From the bay to Sac
Smoke blunts, spit tracks from the back
Hey shorty how you do it?
Thrown back like quarterback threw it
I'm real bad and we get real stupid
Shot heart by a nigga named Cupid

Pain, blame
Shame won't stop the worm inside your brain
Pain, it's growing stronger, growing stronger

If you got an attitude
'Cause you can't agree
If you got an attitude
It's not 'cause of me

Is your life unsatisfactory
'Cause you forgot about skin care?
I got a deal, a four three fifty
A face spraying to complete your blank stare

If you are the messenger, I'll be your passenger
Tell me do you dig the backseat?
Get to the particulars the extra-curriculars
You're safe with me

Why you stepping on my neck?
Who's fly, who's Beck?
Now you're jumping out a wreck
Fruit with triple sec

Might go soft when your life gets hard
It might get rough when you end up scarred
You might sleep better if you don't make art
But my life grows if I go hard

Pain, blame
Shame won't stop the worm inside your brain
Pain, it's growing stronger, growing stronger

If you got an attitude
'Cause you can't agree
If you got an attitude
It's not 'cause of me

I thought I said we were back in stock again
No response to my 33rd text
I want this part to really hurt the listener good
I want to feel their most painful cringe

Shank a goblin like I'm Link
Grande pink drink
Wash a baby in the sink
Armor, no chink

If you are the messenger, I'll be your passenger
Tell me do you dig the backseat?
Get to the particulars, the extra-curriculars
You're safe with me

Might go soft when your life gets hard
It might get rough when you end up scarred
You might sleep better if you don't make art
But my life grows if I go hard

Cancel all my plans
I don't give into demons
You're the one thing I can't stand
Put a gun up to my head

You want me to wake up, that's fantastic
You want me to break up, so sarcastic
Afraid of the shakeup, new cult classic
I think this is your drug, bragging addict

You want me to wake up, back in the crypt
You want me to break up, shouldn't exist
Afraid of the shakeup, tearing a rift
I think this is your drug, not your planet

Give me the prize, I wanna see it right now
The best, I wanna see it right now
I can't believe that this is over
