

Make Her Purr

Dance Hall Crashers

The first time, you knew it was true
You loved her and she had to have you
All that night, she made you feel so strong and husky, male and
musky,
then she got on your horse and took off
That was the last you saw of her

You'd like to think you know her
Know what it takes to make her purr
But she don't live here anymore

You looked around, I'll admit it was sad
Trying to hide that you wanted her so bad
It took some time, then you finally saw her again
and she Ignored you like the rancid mustard in the fridge door
And then, she left with Damon from Blur

You'd like to think you know her
Know what it takes to make her purr
But she don't live here anymore

She don't live here any
She don't live here any
She don't live here anymore
She don't live here any
She don't live here any
She don't live here anymore

You'd like to think you know her
Know what it takes to make her purr
But she don't live here anymore (she don't live here anymore)
You'd like to think you know her
Know what it takes to make her purr
But she don't live here anymore
