

Loved you from the start
There are just some things you know, y'know?
But how did such a priceless work of art wind up at my front door?
To save me from the guillotine, wash off all the gasoline
There's killers out tonight
There's killers out tonight
Just in time for Halloween

It's all for you
Everything I do, I do for you
Nevermind the world that falls apart around us
You could be my world

I swear by this time next year
I'll have all the cash that we could ever need
And I'll get you everything that you deserve
My one and only queen

It's all for you
Everything I do, I do for you
Nevermind the world that falls apart around us
You could be my world

It's all for you
Everything I do, I do for you
Nevermind the world that falls apart around us
You could be my world
