

R.I.P

dandelion hands

You're the air inside my lungs that help me breathe
When I'm having hard time now
But you're here love
And the fears that held me back have long since gone
When you crawled inside my skin
And made your home
Now I'm soaring over seas of bright gold grain
The wind flowing throw my hair
I'm feeling fine
Feeling fine

Darling tell me why can't we just live our lives this way
Knowing everyday
That the love inside my heart will never fade
Us against the world we could survive
These words I cannot hide
I love you wish you were alive

In my dreams I try to find you but you're gone
Like you told me once before
You're no one's dream girl
Play the notes I've locked inside my hiding spot
They're to the beat of my sad heart
You make me cry
Make me cry

Darling tell me why can't we just live our lives this way
Knowing everyday
That the love inside my heart will never fade
Us against the world we could survive
These words I cannot hide
I love you wish you were alive

I miss you
I love you
Wish you were
Alive
