

# Smile

dandelion hands

I've got a baby and she lives just around the corner  
She doesn't know that she's mine so I'll give her some time  
And every single thing about her is nearly flawless  
But we're only friends when she gives me the time

But when I try to hide the way I feel inside  
I get so lost in the thought of what it's like to be alive  
Seeing the same moon you see out your window  
So I will sing the songs that only you have heard  
On top my cursed bed that in time  
You swore became the only place you dreaded leaving

I'm not going anywhere  
I'm not going anywhere until I see you  
Smile  
I'm not going anywhere  
I'm not going anywhere until I see you
