

I Do

Danger Danger

Love. Does it ever feel right?
Why must it hurt us so much
Still we try givin' more than we take
But it seems like it's never enough

Promises made in the heat of the night
Oh they leave us so cold
Nowhere to when we turn out the lights
It feels like we're living alone

Now these days we just sleep in our bed
But I didn't forget what I've said

'Til death do us part
Always here forever is what I swore to you
For better or worse
I meant to when I said it
Every word was true, still is!

I do

Time. Feel it slipping away
Pulling us further apart
But I know if we give love a chance
We'll find the strenght in our hearts

Emotions devotion lie here from our sight
Trapped the hours of time
We'll take to the world but your still my girl
And together we'll find our way out

We bought the dream and the weapons defence
And this is the way that it ends

'Til death do us part
Always here forever is what I swore to you
For better or worse
I meant to when I said it
Every word was true, still is!

I do

We were gonna be there but we were gonna be strong
And I still believe this is where I belong
I'm holding on

'Til death do us part
Always here forever is what I swore to you
For better or worse
I meant to when I said it
Every word was true, still is!

I do

I remember when it was just you and me
Two young kids running wild, running innocent and free
Oh I wish I could turn back the hands of time
