

# The Girl Ain't Built To Sleep Alone

**Danger Danger**

And she walked in the room like a fistful of heat  
A real good looker from her head down to her feet  
Every head seemed to turn like the hands of the clock  
Time stood still she put everybody into state of shock  
Yea she know all the moves and she's got what i takes  
She'll push to the limit and she ain't gonna hit the breaks  
If ya got cold feet you better leave her alone  
She's a woman of the wold and she's doin' it on her own  
I think it's time to go

Oh no, the girl ain't built to sleep alone  
Oh no, the girl ain't built to sleep alone  
I'm gonna take you home with me  
We'll talk about the weather 'til something better comes up  
If ya know what it mean  
You're gonna get a big surprise  
I'm gonna look so hard in your eyes  
It's gonna be alright

I'm goin' outta my head head  
Did you hear what i said? hell!  
I'd rather be dead  
She won't be sleeping not with me in her bed
