

Sad And Lonely Lady

Daniel Boone

Sad and lonely lady
When I see you walking
Something tells me I should walk with you

Sad and lonely lady
When I hear you talking
Something tells me I should walk with you

Sad and lonely lady
Take me back to your house
Cant you see I want to groove with you

Sad and lonely lady
Get yourself together
Cant you see that I want to mo-hoove

Night after night I go out of my head
Thinking things better left unsaid

Sad and lonely lady
Everytime you're near me
Something makes me stop and turn away

Sad and lonely lady
Yell out if shes near me
Cant you see Ive got so much to say

Sad and lonely lady
Take my heart and leave me
Baby wont you show me what to do

Sad and lonely lady
Take me up to heaven
Make me into somebody new

Time after time
I have tried to get near
But you always pretend you dont hear
