

## Warm Hands

Daniel Johns

I wanna write you a letter  
Cos you've been reading me all wrong  
Sartin' to feel a little better  
But it's taken way too long  
Time keeps making lies of all we know

I don't wanna have to wait  
For the words to get off of my tongue  
I just want to remember  
And everybody knows  
Everybody knows  
Everybody knows  
Knows, knows, knows, knows

Tryin' to breathe underwater  
We take the long way around  
Runnin' from border to border  
Tyrin' to understand what we have found  
We've been runnin' in circles  
Can we move on

I don't wanna have to wait  
For the words to to get off of my tongue  
I just want to remember  
And everybody knows  
Everybody knows  
Everybody knows  
Knows, knows, knows, knows

We find ourselves at home  
When I finally get to know you  
And everybody knows  
Everybody knows  
Everybody knows  
Everybody knows

We float from coast to coast  
Following the tide  
Got a green light in the water

In the warm hands of the moon  
We'll find ourselves a home  
When I finally get to know you.
