

# American Dream

Daniel Johnston

I've been across this big wide world  
Seen so many beautiful girls  
And though your eyes don't seem to lie  
You make me feel like mister Hyde

And now I know  
I've finally found the American dream  
And now I'm in love  
I've finally found the American dream

I'm a ghost from her past  
I'm come haunting to your door  
I just can't make it without your love  
You look like heaven above

And now I know  
I've finally found the American dream  
All the love  
I've finally found the American dream

I saw you there I admit I was scared  
So much happening everywhere  
I took a walk around the room  
Like a mummy out of its tomb

And now I know  
I've finally found the American dream  
All the love  
I've finally found the American dream

Late at night I creep up to your window  
You look so beautiful  
I'm Dracula in your thoughts  
You're my dreamgirl

And now I know  
I've finally found the American dream  
And now I'm in love  
I've finally found the American dream

(Thank you)
