

Golly Gee

Daniel Johnston

When I see your face
It puts everything in place
Everything in place

And when I see you smile
Well it makes me smile
It makes me smile

I know, but still I wonder
I know, yes I know

Now I'm really talking
Now I'm really walking
Now I'm really living

And when I see you there
Well suddenly I care
Suddenly I care

You make the world sit still
The world sit still
The world sit still

I know, but still I wonder
I know, yes I know

Now I'm really talking
Now I'm really walking
Now I'm really living

When I see your face
It puts everything in place
Everything in place

You make the world sit still
The world sit still
The world sit still
