

# Please Don't Try

Daniel Lanois

For you see I asked to tell  
What would my future be  
And then one day that answer surely came to me  
That death was a guarantee  
It didn't matter the colour  
The wealth or the things that the world could bring  
Oh, it will come, it will come to you

Please don't try  
Let it come to you

Be it cold or hot  
To shine like diamonds  
Though we must first be cut  
So I said please don't try  
Please don't try, don't fret or cry  
Just trust my love  
Hold on and believe  
It will, it will, it will, it will, it will, oh  
It will come  
It will come to you

I'll hold your hand, I'll be right there  
All the way through the hurt and pain I'll never leave you  
Be right beside you, like a father or mother  
Closer than sister or brother  
You can believe, you can trust and believe  
My love will always be with you

Let it speak in a silent way  
Open up your heart  
Hear me, hear me, hear me  
My love's here to stay  
Let it, let it speak in a silent, silent, silent, silent way  
You'll see my love is right here to stay - my loves here to stay  
Hear me, hear me, hear me  
Hear me, hear me when I say  
Let it, let it speak in a silent, silent, silent, silent way  
My love is right here, right here, right here to stay
