

Power

Daniel Lanois

People got the power (We've got the power)

People got the power (We've got the power)

People got the power (We've got the power)

Power (We've got the power)

People got the power

Power

If people got the power

Why can't we be together?

Alone or as one

Let it be the first chain, we're not done

Not fighting anymore, not fighting any less

'Til the work's all done, no time to rest

People got the power

Power

People got the power

People got the power

People got the power (We've got the power)

People got the power (We've got the power)

If people got the power (We've got the power)

Why can't we be together? (We've got the power)

How would you see beyond the wall?

How would you reason with one and all?

(People got the power)

We know truth and love (People got the power)

In the heart of men (We got the power)

Gotta put on our armor and (People got the power)

Take the right to stand (Why can't we live together?)

No, no, no, no (People got the power)

Don't let me walk alone, no (Why can't we be together?)

Come on, people (Why can't we be together?)

Get all the people, we got ('Cause we got the power)
