

## So Long

Daniel Lavoie

With a mighty roar it lifts off the tarmac and leaves a world behind  
She never thought he'd go, but now he's gone  
And she tries to remember his face, his hands, kisses in the rain  
But the picture's fading fast and whoops it's gone  
So long so long so long so long

Well they cleaned their guns and they went off to fight  
And that's how the West was won  
Setting fire to tipis in the sun  
If you're ready to die for what you believe you can believe most anything  
But I'd rather face the future than a gun  
So long so long so long so long

Well he's lying in a foxhole with her picture on his heart  
Dreaming of making love in the morning sun  
A house on a hill, two lovely kids, he didn't hear the bullet come, come  
Well, it clipped him from world and now he's gone  
So long so long so long so long
