

Finding Joy

Daniel Padilla

Have you been feeling down, been feeling lost
Cause days just seem shorter than before
Feeling out of reach and disconnected
When times get rough just remember this

When every second feels uncertain
All that's lost is given time
You'll be found and you'll be fine
Breathe in deep and see the stars light up the sky

We'll be finding joy together
Day by day
Step by step
With heads up high
We'll break barriers together
Day by day
Step by step
With heads up high

With heads up high

How have you been feeling scared with a clouded mind
Looking at what used to be just fine
Feeling out of focus, days are black and white
When times get tough just remember this

When every second feels uncertain
All that's lost is given time
You'll be found and you'll be fine
Breathe in deep and see the stars light up the sky

We'll be finding joy together
Day by day
Step by step
With heads up high
We'll break barriers together
Day by day
Step by step
With heads up high

Let the lights come through the dark
Let them guide you back to hope
And start to get back on your feet
Even through the uncertainties

We'll be finding joy together
Day by day
Step by step
With heads up high
We'll break barriers together
Day by day
Step by step
With heads up high

We'll be finding joy together
Day by day
Step by step

With heads up high
We'll break barriers together
Day by day
Step by step
With heads up high

Finding joy together
