

# DNA

Daniela Andrade

Tell me what you want from me  
You been gone, go on, make it up to me  
I've been waiting too long for your love  
Know you like it better when it's off the cuff  
I'ma put my weight on it  
Ride it like a wave on it  
Brown liquor in a heatwave  
Always makes me feel this way  
Show me what you know about it  
Tell me that you can't go without it  
(Tell me why)  
You be back on your bullshit  
Hittin' that delay on it  
Ya hittin' that delay on it

I could never beg  
(I could never beg for your love, baby)  
It's not in my DNA  
I could never beg  
(Never)  
It's not in my DNA

Tell me, what you gonna do?  
Slow it down, kiss it like I want you to  
I been waiting too long  
You're so good at laying all that build up  
I'm so good at giving you that good love  
When it really matters will you show up?

I could never beg  
(I could never beg, baby)  
It's not in my DNA

I could never beg  
It's not in my DNA  
I could never beg  
(I could never beg for your love, baby)  
It's not in my DNA
