

Let's Make Out

Danko Jones

I was looking like I'd been left all alone
Drifting around just like those rolling stones
Needed a pick-me-up but then I met you
Everything turned and I knew what to do

You're good looking
And looking good
I'm feeling right
Didn't know I could
Got an idea
Maybe you'd like

Always get your way around it
I know I'll never doubt it

Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long

Driving with the top down
Speeding down the road
No one's gonna stop us
And we're 'bout to explode
Can't keep my eyes off you
You're driving me insane
Waiting for the moment
We can do it again

You're good looking
And looking good
I'm feeling right
Didn't know I could
Got an idea
Maybe you'd like

Always get your way around it
I know I'll never doubt it

Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long

Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long
Let's you and me make out
All night, all night long
Let's you and me make out

All night, all night long
Let's you and me make out
All night, all night long
