

# Never Again

Danko Jones

The trouble with you, you gotta hole in the back of your head  
You forgot all the things that we did  
All the things that we went through  
Baby I still love ya

I love the way you talk down  
I love your condescending tone  
It makes it easy baby  
Makes it damn easy

Never again  
Awww never again  
Never again

Ha ha I love you

I took your promise with a grain of salt  
When you brake 'em it's nobodys fault  
How many times did you come through  
Same old story me feeling blue

I picked you up when you fell down  
But you got up and you left town  
But that's just your nature baby  
It's just your nature baby

Never again  
Yeah never again

The trouble with you, you gotta hole in the back of your head  
You forgot all the things that we did  
All the things that we went through  
Baby I still love ya

I picked you up when you fell down  
But you got up and you left town  
And it ain't your nature baby  
It makes it damn easy

Never again  
Never again  
Never again

Baby, you and I, never again
