

Talk in the Morning

Danny Jones

Missed calls, a message that read
"Can we talk, if there's something wrong?"
I'll try, I'll try, I'll try
To get it off your mind, I try, I try
The small things, they can seem like
Something, with a rush of blood
You try, you try, you try
But all these little problems magnify

With the weight of it all
You're so lost, you forgot you're beautiful
With the weight of it all, hey
It's hard not to fall

When you talk too fast just to fill the space
I can tell by your eyes and that look on your face
Slow down, my darling
We can talk in the morning
Through the dark you'll be burning bright
Put your favourite dress on, we'll dance all night
Slow down my darling
Let's talk in the morning

Let's go out and drink until we
Fall down and laugh about the time
I tried, I tried
To kiss you in the middle of the taxi line
Oh!

With the weight of it all
You're so lost, you forgot you're beautiful
With the weight of it all, hey
It's hard not to fall

When you talk too fast just to fill the space
I can tell by your eyes and that look on your face
Slow down, my darling
We can talk in the morning
Through the dark you'll be burning bright
Put your favourite dress on, we'll dance all night
Slow down my darling
Let's talk in the morning

The two of us get lost in the crowd
The two of us, like no one else around
The two of us, yeah
Can we talk in the morning?
Let's talk in the morning

When you talk too fast just to fill the space
When I look in your eyes I can hold you for days
Slow down, my darling
Let's talk in the morning
Through the dark you'll be burning bright
Put your favourite dress on, we'll dance all night
Slow down my darling
Let's talk in the morning

Talk in the morning
Oh baby, please
Oh!
Let's talk in the morning
