

Away

Danny Vera

Away, take me away
Far from here because I can't stay
Away, take me away
Far from here because I can not stay

I don't want to here any longer
All the love is gone and color has vanished too
Please send me to a place
Where I smell roses and taste honey
Just take me, oh please take me far away

And bring, bring me to
To a place where everything is right and true
Oh please bring me to
To place without lies and no more trouble

Please take me there
Cause I can't bare this feeling
I don't want to understand what's going on
Please take me far from here
Where there is music
Oh please take, take me far away
