

## I'll Get By

Danny Vera

Did you miss me while you were sleeping  
The other night while you were gone  
I got the feeling that you were thinking that I'd like to be al  
one  
Don't you worry, baby, I hate to feel my cold, cold bed  
'Cause the place where you were lying is filled with sorrow and  
regret

And I'll get by without you near me  
And I'll get through these nights alone when you're not there  
All I can do is stumble and trying not to fall

Do you miss me while you were lying all alone in your bed  
I keep thinking that you are dreaming of someone else instead  
The lipstick on my pillow tells me that I'm missing you  
All I do is think things over, it's a shame that we are through

And I'll get by without you near me  
And I'll get through these nights alone when you're not there  
All I can do is stumble and trying not to fall

So I spend the days alone, wondering if you're ever gonna call  
me  
Every day is so damn cold and I wonder if you still love me

And I'll get by without you near me  
And I'll get through these nights alone when you're not there  
All I can do is stumble and trying not to fall
