

# It All Means Nothing (You're Not Here Now)

Danny Vera

The fire's bright and the lights are low  
Mariah sings on the radio  
And it all means nothing  
You're not here now

I've been dreaming about you and me  
Putting little lights up in the tree  
But I'm leaving, oh, darling, I know  
I promise, next December I'll be home

The fire's bright and the lights are low  
Mariah sings on the radio  
And it all means nothing  
You're not here now  
It's cold outside in this winter town  
Spirit's up, but I'm feeling down  
And it all means nothing  
You're not here now

You're not here now  
You're not here now

Oh, it kills me, it tears me apart  
To be alone this Christmas hits me hard  
Everybody says, everybody says, "What's a few days?"  
But it's my favorite time of year to celebrate  
And now there's nothing to celebrate

The fire's bright and the lights are low  
Mariah sings on the radio  
And it all means nothing  
You're not here now  
It's cold outside in this winter town  
Spirit's up, but I'm feeling down  
And it all means nothing  
You're not here now

You're not here now  
You're not here now  
I wish you were here now  
Wish you were here now

Woah  
Woah
