

Love Me Tonight

Danny Vera

The days are so long
And when the evening finally enters the worst is yet to come for me
Because the moon and stars won't let me see the things I wanna see

So I'll turn on the lights
And leave them on just for a moment, so you can see what's going on
Then I'll come back to bed
'Cause it is late and I'm tired and I got this awful pain in my head

And just love me tonight
I wanna feel your arms around me
I wanna be there when you cry
Love me tonight
I wanna be there when you hold me
I wanna be there when you cry, tonight

Now hold me like before
Just lay against me for a while so I can feel your breath once more
If there's something let me know
Just go to sleep so you feel better close your eyes and let it go

And just love me tonight
I wanna feel your arms around me
I wanna be there when you cry
Love me tonight
I wanna be there when you hold me
I wanna be there when you cry, tonight

The moment you awake I 'll be there by your side
Again and again
But if I close my eyes, and we'll sleep through the night
Will we make it alright in the morning

For now just love me tonight
I wanna feel your arms around me
I wanna be there when you cry
Love me tonight
I wanna be there when you hold me
I wanna be there when you cry, tonight
