

Next Night Flight

Danny Vera

Don't forget your overcoat
We're already here too long
We're on the move through countryside

No time for hesitation
Oh, don't you keep me waiting
We gotta move into the night

It's a rush, but lonely feeling
Fidget, agitation
A discomfort being here, alright

Let's take the next night flight and leave
Let's run and be free

I know I ask too much
But what I want from you
Is take my hand and come with me

It's unconditional
I know it can come true
Let's love, hope and belief

And take the next night flight and leave
Let's run and be free
Let's take the next night flight and leave
Come on and run with me

Come get your overcoat
We're already here too long
We're on the move through the countryside

No time for hesitation
Don't you keep me waiting
We gotta move into the night

It's a rush, but lonely feeling
Fidget, agitation
A discomfort being here, alright

Let's take the next night flight and leave
Oh, come on and run with me

Stop anticipating
Avoid what we're delaying
It's not that we have got all night

Don't you take too long
Leave your things and just come on
We're running out of time

I know I ask too much
But what I want from you
Is take my hand and come with me

It's unconditional
I know it can come true

Let's love, hope and belief

And take the next night flight and leave
Let's run and be free
Let's take the next night flight and leave
Come on and run with me

Let's run and be free
Let's fly in the night
Come on and be free
