

Red Moon

Danny Vera

Feel like doing nothin'
Nothin' on my mind
Just sittin' around here
Wasting my time

I feel it slippin' away

Don't care about anything
The light is you
The words I say and sing
So untrue

I feel it slippin' away
Control is leavin' today

There's a red moon in October's sky
There's a red moon in October's sky
And it's following me around for a long long time
See the red moon lighting up the night, lighting up

Don't try to remember
Leave memories behind
But just like an old wound
They burst open sometimes

I feel it slippin' away
Control is leavin' today

There's a red moon in October's sky
There's a red moon in October's sky
And it's following me around for a long long time
See the red moon lighting up the night, lighting up
